

INNOVA Architects Positions for Strong Growth in 2016

A sustainable growth strategy by adding exceptional talent, with a deep diversity in specialized expertise, drives growth by providing more value and interdisciplinary benefits to all our clients.

TACOMA, WA – May, 2015 – ORB Architects joins INNOVA Architects, adding an extensive portfolio of projects, active contracts, and a stellar 50 year history. The majority of ORB’s portfolio includes public sector and government related work, including having successfully completed IDIQ Contracts and Design-Build projects for the Department of Defense, US Army and Joint Base Lewis McChord (JBLM). In its sixth year of operation INNOVA Architects continues to grow by working with great people who provide exceptional service and consistently exceed client expectations.

INNOVA Architects services a wide array of private industrial, medical, retail, and public clients. With the addition of ORB Architects, the client base has expanded significantly to include municipal, state, and federal agencies across the United States. This includes supporting our troops with design services for all branches of the military. ORB’s team also provides specialized expertise for multi-family housing, affordable housing, parks, recreation, aquatics, and interior design.

Combining expertise will strengthen capabilities and portfolio offerings in key industry growth areas

“I am very excited about the ORB Architect team joining INNOVA. In our sixth year of operation and growth, they will help to add several areas of specialization that complements INNOVA’s growing portfolio of private and public projects. To date we have designed over \$3 Billion dollars in military projects alone. Plus, INNOVA is currently in the design process for senior housing and senior care facilities between Hawaii and the Western US having an aggregate construction cost of over \$170 million dollars. Past senior care projects designed by INNOVA Principals amount to projects having construction costs of over \$700 million dollars.” said Paul McCormick, CEO of INNOVA. “Their expertise with multi-family housing, parks, recreation, aquatics, pools and interior design is exceptional,” said James Tsang, President of INNOVA. “They are widely recognized and respected for their sustainable design practices and are going to be an integral part of our future and growth as we expand our capabilities into senior care and sustainable living and work environments.”

“Joining INNOVA Architects is an exciting prospect,” says ORB Architects Principal, Geoff Anderson. “The backgrounds of our two firms will merge well together, and I expect that we will be stronger as a result. This can only benefit our existing clients and position us better when competing for contracts in a highly competitive environment. I am very excited about the possibilities and believe that with our joint expanded capabilities we will be poised for growth in 2016!”

ABOUT

INNOVA is a leading design and consultancy firm in the Pacific Northwest, with its headquarters in Tacoma, WA. Our growing interdisciplinary team includes seasoned specialists and a portfolio of work with over 50 years of extensive experience in Retail and Office Buildings, as well as Multi-Family Housing, Senior Care Centers and Higher Education, Medical Buildings, Healthcare Environments, Civic Centers and Cultural Structures. Their expertise also includes Government Services, Department of Defense (DoD) and Military Branches, Municipal, City, County, State and Federal Agencies, plus Aquatics and Pools, Parks and Recreation. We have constructed over 50 million square feet of industrial warehouses, manufacturing plants and distribution centers, in addition to developing 2,500 acres of master planned properties.

As a full-service architecture and engineering (A-E) firm we provide deep market sector insights and expertise in master planning, all land-use and zoning matters, interior design and space planning, project and management services. Plus, extensive experience in LEED compliance for maintaining natural and environmental harmony.
