

**RIVERTON DISTRIBUTION CENTER - SEATTLE, WA**

INNOVA designed this distribution center for Food Lifeline, one of the largest non-profit organizations in the Puget Sound region. With their two new Seattle warehouses they now have more space than both of their previous facilities combined, which will allow them to double their operations.

**ABOUT FOOD LIFELINE**

Food Lifeline is a member of the Feeding America network. They come up with creative solutions to stop hunger, including redirecting good food from grocery stores, restaurants, manufacturers, and farmers that might otherwise go to waste.

Food Lifeline, founded in 1979, is led by a board of directors who represent the community and the food industry. Food Lifeline's mission is to end hunger, and they feed over 800,000 hungry people in Washington state yearly. With the work of over 70 employees and 20,000 volunteers Food Lifeline is able to send out 100 million pounds of food per year to 275 local food banks, meal programs, and shelters. Their passion, innovation, and policy work allows Food Lifeline to create a sustainable approach to stopping hunger.

**ABOUT INNOVA**

INNOVA is an architectural, engineering, planning, and design firm in Tacoma, WA that specializes in industrial parks, warehouses, distribution centers, manufacturing plants, and aerospace facilities.
